INITIAL IIS CONFIGURATION

In Windows Server, you can install roles and features on local or remote servers using the Server Manager console or the Windows PowerShell cmdlets.

1) ADD WEB SERVER ROLES/FEATURES (WINDOWS SERVER 2016) USING POWERSHELL

a) Launch PowerShell, `Windows Desktop > Right-Click` **`Windows PowerShell`** `on the taskbar > Click` **`Run as Administrator`**

b) Copy and paste the following line into PowerShell and press **Enter** (this will install all the roles and features needed for a HISMC server installation):

Install-WindowsFeature -Name NET-Framework-Features,NET-Framework-Core,NET-HTTP-Activation,NET-Framework-45-Features,NET-Framework-45-Core,NET-Framework-45-ASPNET,Web-Server,Web-WebServer,Web-Common-Http,Web-Default-Doc,Web-Dir-Browsing,Web-Http-Errors,Web-Static-Content,Web-Http-Redirect,Web-Http-Logging,Web-Custom-Logging,Web-Stat-Compression,Web-Filtering,Web-Mgmt-Console -IncludeManagementTools –Restart

Ex)

```
PS C:\Users\ts86557> Install-WindowsFeature -Name NET-Framework-Features,NET-Framework-Core,NET-HTTP-Activation,NET-Fram
Server,Web-WebServer,Web-Common-Http,Web-Default-Doc,Web-Dir-Browsing,Web-Http-Errors,Web-Static-Content,Web-Http-Redire
ering,Web-Mgmt-Console -IncludeManagementTools -Restart
```

c) Alternatively, you can copy and paste the *install_Roles_Features.ps1* PowerShell script on to the Windows Server and run it as an Administrator. The *install_Roles_Features.ps1* PowerShell script can be found internally at:

\\...\MediSpanClinicals\Scripts
